

## Camping

Camping parks are a great place to bike. Never leave your bicycles behind because you are towing a camper, boat or have limited space. Take all the equipment you enjoy, including a group of **Carriers** for your entire family.

## Boating

Travelling via waterways doesn't mean you have to lose your ground transportation. **The Carrier** can fit in vessels of various sizes, including a canoe! Discover what lies on the land of that distant shore with **The Carrier**.

## RV Travel

Fit several bikes in your motor home. **The Carrier** fits nicely in the storage areas of most motor homes. Keep your bicycle secure and out of the elements when you travel.

## Bike Carrier Free

Don't ruin your vehicle with a carrier. Why deal with a bike carrier that can scratch your vehicle's finish and makes the vehicle look clumsy? **The Carrier** fits in the trunk of even the smallest super compact and sports cars.

## Cross Country

Airline travel with **The Carrier** is a snap! Wherever your destination, **The Carrier** can be checked in as luggage and fits easily into a taxi or rental car and in hotel rooms.

## Recreational Pilots

Explore the area of your next destination with **The Carrier**. It fits inside the smallest personal aircraft with ease.

New Innovation:

# The Carrier

The Original "Bicycle in a Bag"

The mountain bike that requires only 8 cubic feet for storage and can be assembled in 2 minutes, without any tools.

Easily Transported in:

Ultra-Compact Cars

Compact Cars

Compact Trucks

Boats & Canoes

Sports Cars

Whether travelling to a local park or flying across the country, **The Carrier** can be transported easily in two bags.

Two bags offer the ability to better distribute the bike when carrying. It also makes loading into a tight space much easier.

The rear frame assembly, seat, and quick-release handlebars are situated in one bag.

The front fork assembly and center frame fit in the other bag.

**The Carrier's** storage bags fit neatly into a third bag designed to fit on the front handlebar.

Patent #: 7,578,515  
Other Patents Pending

Motor Homes and RVs can carry multiple **Carriers** securely and out of the elements in the storage areas during travel. No need to worry about **The Carrier** when it is stowed away during travel.

**The Carrier** can even fit inside the cabin of one of the smallest personal airplanes, the Cessna 150. It's perfect for aeronautical fly-ins and for basic ground transportation at nearly any destination to which you can fly.

The innovative design of **The Carrier** allows it to be stowed in the smallest of vehicles.

**The Carrier** fits in the diminutive trunk of the Chevrolet C6 Corvette convertible with some room to spare. It fits neatly in the rear storage area of the Mini Cooper.

**The Carrier** requires only 8 cubic feet of storage area when disassembled. It's patented three-piece design makes **The Carrier** easy to lift and handle.

**The Carrier** fits neatly behind the seats of a standard cab compact pickup truck like the Chevrolet Colorado.

**The Carrier** is a full size 26-inch, 21 speed mountain bike. It can be assembled or disassembled in less than 2 minutes without the use of any tools, and fits neatly into two separate bags.

With its fast assembly and disassembly, compact design and rugged storage bags, **The Carrier** easily adapts for boating use. Whether simply canoeing across a lake or river or a week long excursion in a cabin cruiser, **The Carrier** is an effective and reliable bicycle for your land excursion when you reach your next port.

## The Carrier

- Stores in 8 Cubic Feet
- Standard Size 26" Bicycle
